What changes would you recommend for improving the quality of syllabus?

- Syllabus should be periodically updated by the affiliating University. Current scenario should be kept in mind, recent topics should be included in the syllabus and syllabus should be updated with time. Syllabus should also prepare students for competitive exams. Some popular case studies should be added. More Skill oriented syllabus is to be included.
- पाठ्यक्रम को और रोचक बना सकते हैं
- Complete topic should be included not only in fragments. More focus should be there for practical in science subjects.
- Inclusion of College teachers while syllabus is being prepared.
- Incorporate active learning strategies, group activities, discussions, case studies, and real-world applications to engage students and promote deeper understanding and retention of the material.
- Number of Practical's must be increased and should be fixed for particular course . Also a project should be there for final year students.
- Identify additional materials or equipment needed for the course

- Inclusion of one industrial visit in the syllabus of UG courses
- Syllabus is well framed
- Provide Professional Development Opportunities for Teachers. Use Technology as an Educational Tool. Foster Effective Parent-Teacher Relationships. Create a Supportive Learning Environment.
- More emphasis should be on Skill based curriculum.
- SEC courses are neither here nor there; hardly any skills are learnt but take the important place of other core Physics subjects. They aren't useful for higher studies in Physics. Students suffer in PG entrance exams.
- Quality of Syllabus can be improved if prepared after considering the rural background of Students rather than Copying syllabus from Prestigious Universities

What kind of support do you need in order to enhance effectiveness of the teaching -learning process?

- Getting support as and when required.
- We have good support.
- दृश्य श्रव्य उपकरण
- Smart board, Theatre room, Language Lab and some translation software are required
- Smart board, theatre room, language lab and some translation software's should be provided.
- Availability of smart classroom.
- There must be separate department and departmental library for PG Students
- Need a proper space and techno friendly room for smart learning
- IT infrastructure support
- Financial support to students for educational trips (as they are tourism management students)
